

File Name: dogs

Data: The dog or domestic dog (*Canis familiaris* or *Canis lupus familiaris*) is a domesticated descendant of the wolf.

The dog is derived from an ancient, extinct wolf, and the modern wolf is the dog's nearest living relative. The dog was the first

species to be domesticated,[9][8] by hunter-gatherers over 15,000 years ago, before the development of agriculture. Due to

their long association with humans, dogs have expanded to a large number of domestic individuals and gained the ability to

thrive on a starch-rich diet that would be inadequate for other canids.
