File Name: cats
Data: The cat (Felis catus) is a domestic species of small carnivorous mammal.[1][2] It is the only domesticated species in the
family Felidae and is often referred to as the domestic cat to distinguish it from the wild members of the family.[4] A cat can
either be a house cat, a farm cat, or a feral cat; the latter ranges freely and avoids human contact.[5] Domestic cats are valued
by humans for companionship and their ability to kill rodents. About 60 cat breeds are recognized by various cat registries.
